LTV 210T: UNLIMITED VIEWING

The Olivetti LTV 210T monitor is a new dimension in viewing performance. An innovative system that transforms the ways people use the PC monitor, it opens up exciting new possibilities for work and leisure.

A monitor with an eye-catching design, the LTV 210T is a perfect blend of state-of-the-art technology and superior versatility. This means you can use it with any video device – a television or DVD, a digital camera or PC – to replace the conventional TV screen with “global visual output”, which you program with a lightweight remote control. The monitor is equipped with four video input connectors (VGA, DVI, S-Video and Composite), a TV antenna jack, a Scart socket and an audio input/output connector. Features also include 5 W lateral stereo speakers and a subwoofer output for superlative sound.

THE SHAPE OF INNOVATION

The 21-inch monitor with 1024 x 768 dpi resolution has an ultra-flat liquid crystal display and a design that makes it a smart addition to your home or office. With a VESA FDMI mounting kit, it can be fixed to the wall as an added enhancement to the surroundings. The Olivetti monitor offers broad viewing angles, together with a bright, glare-free picture with no distortions. Its advanced technology eliminates electro-magnetic fields and delivers flicker-free images.

TWO IN ONE

With its innovative “Picture in Picture” function, the Olivetti LTV 210T monitor lets you watch television while you work at the desktop. TV programmes play on an on-screen window with four different size settings, which can be moved anywhere on the screen. So you can relax with your favourite television programme and carry on working at the PC.
